PROFESSIONAL EXPERIENCE

Accenture - AI/ML Computational Science Sr Analyst

São Paulo, São Paulo | 01/2023 - Atual

I work on developing and evolving solutions with GenAI and intelligent automation, focusing on AI agents, conversational flows, and chatbots across different channels and use cases — customer service, sales, and operational support.

I also have experience in observability and AIOps, supporting mission-critical environments with monitoring, intelligent incident response, and remediation automation.

I have also participated in functional analysis, data visualization, and integration projects using process and project automation tools.

Tenbu - Senior Systems Analyst

São Paulo, São Paulo | 08/2021 - 01/2023

I worked on sustaining and supporting analytical environments, ensuring availability and performance of data visualization and analytics tools. Responsible for ticket management, problem diagnosis, and continuous improvement implementation in supported environments.

Tenbu - Junior Systems Analyst

São Paulo, São Paulo | 08/2021 - 01/2023

Keyrus - Junior Support Analyst

São Paulo, São Paulo | 03/2020 - 07/2021

I started my career implementing and maintaining analytical tools and servers using ticketing systems for demand management. I also worked on developing T-SQL solutions and creating and maintaining ETL processes, which gave me a solid foundation in data and systems integration.

OBJETIVO

I am interested in roles in **AI for operations**, with a focus on **GenAI, AI agents, workflow automation, and observability (AIOps)**. I am seeking positions where I can contribute to designing and implementing intelligent solutions for customer service, operational support, incident response, connecting technology, efficiency, and user experience.
